

## RAYOCOMP DEVICES

### RAYOCOMP PS 1000 polar 4.0 med.

#### FOR STATIONARY MEASUREMENTS AND TREATMENT

The Rayocomp PS 1000 polar 4.0 med. has comprehensive treatment modules and the Rayoscan function. The Rayoscan is an ECG-based device that measures the patient's "energetic fingerprint" and, together with the patient's medical history, allows for conclusions to be drawn about energetic deficits. The frequencies needed for optimal treatment can be determined and an individual treatment plan can be created based on this analysis. This treatment program can be stored on a RAH "Green Card".

### RAYOCOMP PS 10 MED.

#### FOR PORTABLE USE, E.G. IN HOME THERAPY

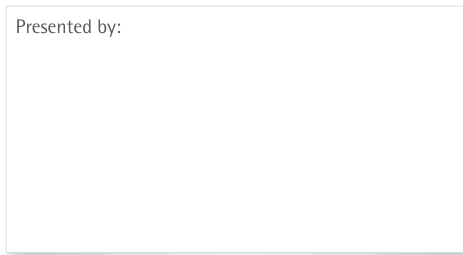

With the mobile Rayocomp PS 10 med. and the unique RAH "Green Card", therapists and patients have the option of using bioresonance therapy according to Paul Schmidt with outpatients or as an accompanying therapy at home. The scan function was not included in the design of the portable devices.

Furthermore, the Rayocomp PS 10 med. is recommended when applying individual therapies or using compact programs.

Please note: Irrespective of the breadth of information, advice and problem-solving approaches provided hereby and resulting from over 30 years of experience, it cannot replace the visit to a practitioner of alternative medicine or a physician with an interest in naturopathy. Further, please note that traditional orthodox medicine does not accept or even recognise the effects of bioenergetic oscillations.

## INFORMATION ON BIORESONANCE ACCORDING TO PAUL SCHMIDT

## BIORESONANCE ACCORDING TO PAUL SCHMIDT

The unique combination of German engineering and an understanding of alternative health care is what makes our medical devices so special. The treatment is based on one of nature's principle: Sunlight is the most well-known form of bioresonance. When sunlight comes in contact with our skin, our skin darkens. This is caused by the UV component of sunlight, which has a frequency spectrum in the high terahertz range. In 1975 the engineer Paul Schmidt discovered that not only the sun's frequency spectrum, but also other frequency spectra have an effect on the body: this marked the birth of bioresonance according to Paul Schmidt as we know it today. In short, it is based on stimulating the organism with the aim of supporting self-regulation. Since then, Rayonex Biomedical has actively been researching other frequency spectra that can be transmitted to patients during treatment with modern bioresonance devices.

The book accompanying the method Bio-Resonance According to Paul Schmidt by Prof. Dietmar Heimes, 544 pages, 197 illustrations, an appendix with over 200 pages, 4th edition, introduction, devices, application.

## LOCALLY PRODUCED – USED WORLDWIDE

Today, Rayonex Biomedical is a well-established medical device company that is present in 45 countries around the world. However, our origin has local roots: Rayonex develops all of its products, which are “Made in Germany”, in the striking Sauerland-Pyramids in Lennestadt, Germany. This is also where the company headquarters are

located. The products are manufactured in the Rayonex factory close to the Sauerland-Pyramids. Our manu-

facturing processes are carbon neutral and highly precise due to the use of robots. Rayonex Biomedical GmbH is certified to develop, produce and distribute medical devices according to DIN EN ISO 13485:2016 and is audited by TÜV Nord on an annual basis.

## TESTED AND FOUND TO BE EFFECTIVE

Over the last few years, Rayonex Biomedical has conducted several studies on bioresonance according to Paul Schmidt. As part of a clinical evaluation of active medical devices to prove their safety and effectiveness the most meaningful of which is the new clinical prospective, double-blind, randomised study on pain reduction in patients with cervical spine syndrome was carried out. This study proves that, in the truest sense, bioresonance according to Paul Schmidt works with waves of success.

## THE RESULTS – WELL-ESTABLISHED AND RE-PROVEN

The treatment with the Rayocomp bioresonance device showed significant improvements in all parameters. Whereas the placebo treatment did not achieve any significant improvements in neck pain, headaches, back pain or muscle tension.

This scientific study proves to patients and therapists that bioresonance according to Paul Schmidt can be used safely and effectively. Thus, the results of the study confirm what users have been saying for decades: Bioresonance therapy according to Paul Schmidt relieves symptoms and helps give patients a new sense of physical well-being.
